

## Sharon Ho for Logistics Officer

---

### About me

I am a Second Year Medic from Gonville and Caius College. I am from Hong Kong. I am currently the Logistics Officer of SciSoc and I know how it works!

### Experience

I am currently the Logistics officer in SciSoc. I know how things work if it is going to be online again next year (hopefully not)

Being the Activity coordinator of Mathematics Team. I organised activity for club meetings and also the inter-class Mathematics Contest. I learnt how to cooperate with other committee members to make sure the event runs smoothly.

Holding the role of the Committee member of Campus TV Team. As the Chief Video Editor, I taught team members how to edit videos and am also responsible for editing videos for big school events. I have learnt to communicate with teammates and manage my time wisely

### Ideas for Sci Soc

More different variety of snacks in the physical talks if allowed

Chances for members to interact with the speaker before or after the talk in the foyer

I don't mind being Director of Technical Affairs if I cannot be a Logistics Officer.

### Why would I want to become a committee?

I have attended many talks these 2 years and I find them very interesting. I really want to continue to be involved in organising the talks and various events. I also wish to interact with other Sci Soc members that are equally interested in the talks.

### Why me?

I attended almost all SciSoc talks! I am very enthusiastic about the talks. Last year when there was still physical talks I went to most of them. I am currently on the committee so I know how things will work.

I will provide more snacks to the event, having a variety of different flavor of crisps and chocolates!
