

VICTOR LU FOR SCISOC SECRETARY

Any questions: email me! yzl23@cam.ac.uk

ABOUT ME

Hi everyone! I am a 4th year medic at Christ's.

I have thoroughly **enjoyed** attending talks and events held by SciSoc, and would love to be involved in making these events **bigger** and **better**.

I am **passionate** about promoting science throughout the university, showcasing **cutting-edge research**, and encouraging **scientific discussion** and **collaboration**. Joining the SciSoc committee is the best way to do so.

WHY ME

As a medic, I have a strong work ethic and I get things done. I am good at multi-tasking, and am not afraid of taking on responsibilities. I am **organised** and **committed**.

As **secretary** for **Cambridge Health Leaders**, I was involved in **organising** events, **liaised** with prominent speakers for talks, and am currently busy organising our **annual conference**.

I am **treasurer** of **Cambridge University Transplant Society**, and have **managed** large sums of money, and **organized** our accounts.

Back in school, I was **president** of the **science society**.

VISIONS FOR SciSoc

1. A **mentorship program** or mentoring clinics. Mentors could offer guidance such as help with supervision essays, exam tips, advice on how to pick and apply for internships, or simply some welfare support.
2. **Raise the profile of SciSoc** in the university.
Circulate bulletins more widely, between different university departments.
Informal drinks reception (once COVID is over!) for new/potential members.
3. Annual SciSoc **science festival** that would comprise popular-level lectures, poster exhibitions, essay competitions, workshops, debates/discussions.
4. Have our own **SciSoc journal**, to become a student-run, open-access, peer-reviewed journal based in Cambridge. We will encourage students from any scientific discipline to submit their research.
5. **Fundraising activities** throughout the year, such as bake sales, fancy dress 😊
