

Xingjian Hou

For Director for Logistics

Hi, I'm Xingjian Hou, a first-year Natsci at Trinity running for the *director for logistics*.

Experiences

I love organising & ensuring that every detail runs properly :)

- **Co-president** of my high school's **Physics Society**, organising physics tournaments and events, and managing social media.
- Organised my high school's **Host competition** at the Student Union – lots of logistics work!
- *More importantly... I've been enjoying SciSoc talks and really benefitted from the Academic Internship Event! I'd love to contribute to Scisoc's efforts :)*

Proposals

- **Interdisciplinary talks**
More talks on science and society, interdisciplinary research, etc. – a unique perspective SciSoc can provide & can attract people from diverse backgrounds!
- **More support for studying NST**
Workshops on learning, scheduling, and preparing for exams (see how natscis struggle on Camfess ... :()
- **Introducing science careers outside academia**
Career fairs, talks, ...

I will always be devoted and responsible to ensure everything runs smoothly, so we can better promote science across Cambridge and the society :)
